

Another Macmazza for Watford Timber

Five years ago, Watford Timber Ltd, an independent company that has been trading for more than half a century, purchased a Macmazza beam saw as part of their expansion programme. With demand for their sheet materials, both MDF and timber, continuing to increase, they had a requirement for additional manufacturing capacity and investigated the options available. Impressed by the reliability and flexibility of the Macmazza machine, they decided to purchase a second beam saw from the same source, a machine capable of handling panels up to a stack size of 5700mm.

Macmazza, based in Pesaro, Italy, have manufactured beam saws for 30 years. The company specialises in this product, supplying custom-designed as well as standard models. Macmazza beam saws cover the full range from front and rear loading models to flexible angular systems and fully automatic angular plants. Complete turnkey projects are managed and systems to handle thin and delicate sheet materials are a speciality.

Situated in the heart of the Italian furniture manufacturing industry, surrounded by competition, Macmazza have a strong position in their home market, with significant and growing sales in other European

Macmazza beam saws feature a double microprocessor with an IBM compatible PC as standard

countries, Turkey and the Middle and Far East.

Macmazza beam saws feature a double microprocessor with an IBM compatible PC as standard, and are manufactured (not just assembled) in-house to heavy-duty "no compromise" designs. They have more dust extraction, longer flotation tables, unique "jumping" grippers and probably the best diagnostic, machine status checks, maintenance and spare parts software available on any comparable beam saws. Self-explanatory alarms and simple e mail communication directly with the Macmazza service department ensures minimal downtime.

Graham Perry, Director of Watford Timber, says: "Our customers rely on us and we, in turn, need to be able to rely on the equipment we purchase. With 5 years' experience of Macmazza, we had little hesitation in asking them to supply a second beam saw."

Macmazza is represented in the UK by CDE Machinery Ltd:
